

windproof. They feature 100 grams of Thermolite insulation throughout the garment. The outer fleece is a water-resistant fleece that will not let water soak into the outer layer of the garment and the inner fleece is a heat retention fleece that will actually cause you to heat up as soon as you put the garment on. This product group is treated with an anti-microbial finish to keep you scent-free and is available in Mossy Oak DuckBlind, King's Snow Shadow, and Black.

Introducing the Break-Thru release aid. This release is simple to use and take advantage of the inherent and natural squeezing of the safety to enable firing of the release. Once the safety has been disengaged, all you have to do is pull with back tension until the release fires. Just aim and the arrows go in the middle. Target panic is a thing of the past.

Watch and learn how the top pros level their sights! You truly are buying points if you are a tournament archer, or ensuring a quick humane kill if you are a bow hunter. No more unknown misses on slopes due to improper third axis adjustment. Included with the Sight Leveling Made Easy DVD is the Easy Third Axis Level tool, the two combined is all you need to properly level your entire sight system.
